A fine quality medicine cabinet to match fine quality plumbing fixtures assures the success of any bathroom plan. Because the medicine cabinet is used more frequently than any other equipment in your home, it is important that you choose genuine Lawson quality. If the medicine cabinet selected is of adequate size, it will increase the value of the home by providing sufficient storage space for the ever increasing number of toiletries and medicines being used by American families.

Dangerous Medicines Kept Under Lock and Key Out of Reach of Small Children

Every year more than 200,000 persons in the United States, mostly children, are victims of Accidental Poisoning. It kills more children than polio, diphtheria and scarlet fever combined. Avoid storing drug products such as aspirin, peroxide, iodine, rubbing alcohol, wintergreen, etc., in low open shelves or drawers within easy reach of children.

CONSTRUCTION FEATURES

ONE PIECE DRAWN SEAMLESS STEEL BODY, BONDERIZED AFTER FORMING. Rounded inside corners for easy cleaning; White Enameled Piano Hinge with Brass Pin; Adjustable and Removable Aluminum Shelf Supports; Bar Door Stop; Bullet Type Door Catch; Bulb Edge Glass Shelves; Stainless Steel Toothbrush Holder; Baked White Enamel Finish. CUSTOM STYLING and EXTRA CAPACITY
 achieved with **LAWSON STOCK MODEL**
MEDICINE CABINET
ENSEMBLES

TWIN ENSEMBLES

Storage Capacities Ranging From 2064 to 3838 cu. in.

The *Ensembles* listed on the opposite page offer a profitable new concept in medicine cabinet selling — the right style *ensemble*, at the right price, for every bathroom plan. Utmost flexibility in storage capacities — from 2064 cu. in. to 5757 cu. in. A simplified inventory of “key” Lawson Stock Model Medicine Cabinets makes for easy and profitable merchandising of the *Ensemble* idea. It’s a natural for extra year ‘round sales — every new home, large or small, is a prospect.

ORDERING INFORMATION

For TWIN or TRIPLE *ensembles* give cabinet stock number and specify (1) right hand and (1) left hand for TWIN, or (2) right hand and (1) left hand for TRIPLE *ensemble*. Also order (1) stainless steel joiner strip for TWIN or (2) joiner strips for TRIPLE *ensemble*. See opposite Page 11 for size of Joiner Strip required for each size cabinet.

TRIPLE ENSEMBLES

Storage Capacities Ranging From 3096 to 5757 cu. in.

"T" WALL PLATE

Saves Time! Saves Labor!
No Cutting or Drilling of Tile!
 Available for Puritan Or Pilgrim
 Accessories at **NO EXTRA COST**

The "T" plate is the most efficient plate on the market. It not only affords one of the strongest and most secure anchors for bathroom accessories but it is the easiest to install and takes less time than any other type plate. **TILE DOES NOT HAVE TO BE CUT OR DRILLED.** Plate can be placed at any point horizontally which eliminates any need for cutting standard length towel bars to fit mortar joint.

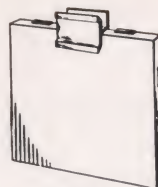

Fig. 1

Place at any horizontal position.

(Fig. 1) May be necessary to nip or rasp off tile lugs if not placed between them.

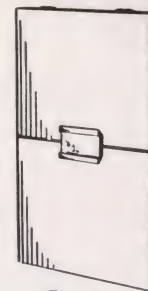

Fig. 2

Place upper tile in top side of "T" plate.

(Fig. 2)

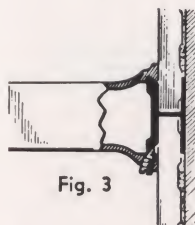

Fig. 3

Figure 3 illustrates strong anchor provided by "T" plate.

If "T" plate required specify 905-T, 306-T, etc.

PILGRIM "S" and "L" WALL PLATES FOR CHROME BATHROOM ACCESSORIES

Fig. 1

The "S" and "L" type wall plates are made of a heavy gauge steel, zinc plated. These plates cannot break because of the tough non-brittle nature of steel.

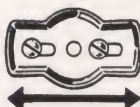

Fig. 2

The screw slots in the wall plate allow a lateral adjustment of $\frac{1}{4}$ " as shown.

This feature reduces the accuracy necessary in mounting the towel bar wall plates, and the brackets can be adjusted to a snug fit against the bars which eliminates rattling, etc.

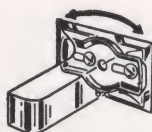

Fig. 3

The most important feature of this wall plate is the circular adjustment as shown in the illustration. In most cases when attaching wall plates the drill or screws can shift slightly resulting in a mounted wall plate that is not horizontal. This feature permits the installer to straighten the fixture to perfect alignment.

Fig. 4

The "L" type wall plate for cement use has a reverse tapered lug with holes that forms a wedge when cemented in the wall which cannot pull out. This wall plate also incorporates the important circular adjustment shown in Figure 3.

The wall plates available in the Pilgrim line of accessories provide more and better features to aid the installer than any other wall plates on the market today; the "S" type for screw attachment, the "L" type for cement installation and the "T" plate shown above for mastic or cement installation.

At left are some illustrations and descriptions of the "S" and "L" features that not only are time savers when installing chrome accessories but due to their adjusting features result in a better and more perfectly aligned installation.

 Are Available For Puritan
 Chrome Bathroom Accessories*

INSTALLATION CLAMPS

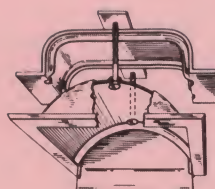

Save Time and Labor when installing Lawson S-Type Recessed Fixtures.

Clamp made of heavy gauge steel zinc plated. Two brass chrome plated bolts furnished for use in walls with $\frac{3}{4}$ " to $1\frac{1}{4}$ " thick facing. Wall opening should be not less than $3\frac{3}{4}$ " deep (normal 2 x 4 stud) or $1\frac{1}{2}$ " to nearest stud . . . except for paper holder; then it can occur next to stud as paper holder clamp installs in vertical rather than horizontal position.

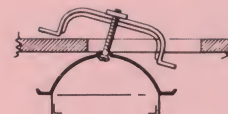

Specify No. 39 Clamp for all Recessed Accessories except as noted below:

Specify No. 24 Clamp for Recess Accessories Nos. 255, 256, 257, 455, 456, 457.

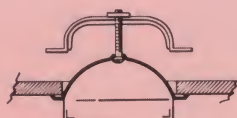

Installation Clamp NOT available for No. 350.

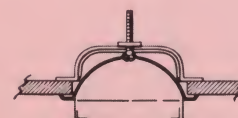

1. Insert screws thru Recess Fixture and into installation clamp until screw extends thru clamp approximately $\frac{1}{8}$ ".

2. Insert Recess Fixture with clamp attached into opening.

3. Center Recess Fixture in opening with back of face flange firmly pressed against room side of wall opening.

4. Tighten screws until fixture is firmly held in place.

LAWSON MEDICINE CABINETS

WILL LAST LONGER BECAUSE....

*Place All Drugs
Out of Reach
of Small Children*

Every corner is protected against rust and corrosion.

Every edge is protected by Bonderite — no rust or corrosion can penetrate the metal surface.

Every drill hole is protected against rust by the Bonderite Process.

CUT-AWAY CORNER SECTION OF
LAWSON ONE-PIECE DRAWN SEAMLESS
STEEL MEDICINE CABINET BODY

THEY ARE BONDERIZED AFTER FORMING

The smooth, lustrous finish on Lawson Medicine Cabinets is highest quality baked enamel. It is attractive, pure white, easy to keep clean. And this fine finish will stay bright and fresh through years of service, because it is protected by Bonderite. At Lawson, this effective corrosion resistant process is applied to cabinets after forming. By Bonderizing after forming, every drill hole, every edge, every corner gets full protection against rust.

Explanation of Bonderite Finish

Bonderizing actually changes the surface of the metal from steel to a nonmetallic surface. This coating actually penetrates the metal. It is a part of the metal, not a separate layer or skin. While bare metal surfaces provide almost no foot-hold for enamel, the Bonderite coating forms an anchor and keeps it from lifting or peeling.

The forces of rust and corrosion are defeated by Bonderizing because it is nonmetallic and prevents moisture from reaching the base metal. On untreated metal a scratch that breaks through the enamel film to the bare metal means real trouble, because rust creeps back from the scratch. Bonderite coating prevents this creeping of rust.

General Notes

The selection of a Medicine Cabinet should not be considered an incidental item. Consideration should be given to the frequency a Medicine Cabinet is used daily — not by one but by every member of the household.

If carefully selected, it will beautify the bathroom to a far greater degree than the difference in price between a small ordinary cabinet and a larger one. It will provide much needed storage space and, of particular interest to parents, provide a safe place for keeping aspirin, iodine, sleeping pills, etc. out of reach of small children.

A Medicine Cabinet should be selected with the idea that it should render lasting trouble-free service for the lifetime of the house. Lawson had this in mind when incorporating the following features in their cabinets.

ONE-PIECE DRAWN SEAMLESS STEEL BODY with rounded inside corners, for easy cleaning, no cracks or seams for moisture to accumulate and cause rust.

BONDERIZED AFTER FORMING to insure complete coverage of every square inch of surface, including edges. Bonderizing is not only a rust preventive but provides an excellent bond for anchoring the white enamel finish to the base steel.

All insert type hinge door cabinets furnished with full length piano hinge with brass pin, or on some models all stainless steel hinge. No sagging or squeaking of doors.

Lawson Insert-type Medicine Cabinets are provided with removable and adjustable non-corrosive shelf supports (except where noted) to provide greatest possible selectivity in shelf locations, and can be removed for easier and more thorough cleaning of cabinet.

Lawson Medicine Cabinet Mirrors are manufactured in accordance with National Bureau of Standards

Specification CS27-36 and are guaranteed against silver spoil for a period of five years from date of manufacture, not one year as provided in specification referred to above.

Frameless Mirror Cabinets held in place by ratchet-type mirror clips — no screws or bolts, and consequently, no holes in mirror.

Lighted Cabinets are wired complete at factory and carry Underwriters' Laboratories Label. Installation is simple. House wire connection located at knock-out box in top center of cabinet. Wire connection accessible from cabinet interior by removing snap-in electrical inspection plate, no screws to pinch insulation on cabinet wires.

Warranty: All materials unconditionally guaranteed against defective workmanship. No merchandise, however, should be returned without prior notification and authority from main office at Cincinnati.

Installation Instructions furnished with each cabinet. Location of cabinet above floor line is optional. Most common practice is 63" from floor to center of wall opening.

Distribution of Lawson Cabinet Division Products is through Hardware, Plumbing, Electrical, Tile and Building Supply outlets throughout the United States, Canada and many foreign countries.

Special Cabinets not shown in catalog quoted upon request if no special tools or dies are required, or if quantity is sufficient to absorb cost of special tooling. Submit quantity information and detailed description for quotation.

Architects are invited to write for detailed specification describing any Medicine Cabinet illustrated. The following is a typical specification describing our No. 4133 Cabinet:

"Furnish Medicine Cabinet with ONE-PIECE DRAWN SEAMLESS STEEL BODY, BONDERIZED AFTER FORMING, for wall opening 14½ x 18½ x 3½". Mirror 16 x 22" plate glass, conforming to National Bureau of Standards Specification CS27-36, with polished stainless steel frame. Door supported by full length, white enamel piano hinge with brass pin. Furnish two (2) bulb edge glass shelves, supported by removable and adjustable aluminum shelf supports. Finish — baked white enamel."
